

PhaseLink Corporation Receives ISO14001 and ISO9001 Accreditation

Fremont, California. – August 1, 2007 – For Immediate Release

PhaseLink Corporation, a leader in frequency source generation and inventor of the Analog Frequency Multiplier™, and PicoPLL™ today announced it has received full accreditation for the ISO9001 and ISO14001. The ISO14001 is a new accreditation for PhaseLink, while ISO9001 is a recertification of the original accreditation.

The ISO9001 was awarded in recognition of the high quality control and efficiency standards PhaseLink provides, while ISO14001 was awarded for complying with stringent environmental impact regulations and implementing an environmental friendly policy.

"We're delighted to achieve this major accomplishment", said Da-Chuan Chang, Chief Executive Officer of PhaseLink Corporation. "This is a testament to our relentless quest to offer the highest level of product quality and reliability to our customers."

PhaseLink has been shipping RoHS/Green compliant products for the last several years and is committed to working proactively with industry peers and suppliers to implement technologies and procedures that reduce the use of hazardous substances.

About PhaseLink Corporation

PhaseLink Corporation is the recognized leader in mixed signal technology for timing source and signal conditioning ICs, for Communications, Data Storage, Personal Computing, and Consumer Products. An innovator of many first to market products such as Analog Frequency Multipliers, Triangular Modulation SST, PicoPLL (world's smallest programmable clock), SMART-BYTE™ Programmable clock chip, and many others, PhaseLink offers one of the broadest IC product lines in the industry (XO, VCXO, AFM, PhasorV, EMI reduction, programmable, Video, and LAN clocks).
